***SB247 Prevention of Childhood Lead Poisoning Compliance Report***

On January 29, 2019, the Early Learning Center received the test results from a NH state-certified laboratory, of water samples taken from every faucet in the building where water is available for consumption by children.

We are pleased to report that all water samples tested were in compliance with the state standard for lead. This analysis will be repeated in 2024, as per NH state requirements.

Please contact the temple office, [templeoffice@templeisraelnh.org](mailto:templeoffice@templeisraelnh.org) with any questions or concerns.

Thank you!
